

PAPER CHEMICALS

ITEM NO.	MAIN COMPONENT	FORM	SOLID CONTENT (%)	VISCOSITY (CPS)	PH	M. F. T. (°C)	MAIN USES	SPECIAL FEATURES
C-350	Petroleum Wax	White Emulsion	40±1				Water Repellent Agent, Used for Paper Internal Sizing and Surface Coating	Acid Stable, Can be Blended with Rosin Soap for Application to Required Properties
C-300	Petroleum Resin	White Emulsion	30±1	<100	11.5~12.5	-	Water Repellent Agent	Good Heat Resistance and Anti-slip
AM-200	Acrylic Resin	White Emulsion	40±1	<100	4~5	35	Gloss Agent for Paper and Wallpaper Coating	Hard Film, Excellent Blocking & Water Resistance and Brightness
MC-5	Styrene Acrylic Copolymer	White Emulsion	50±1	<100	8~9	12	Binder for Art Paper and MC Coating	Good Picking Property, Luster, Weather and Water Resistance
MC-7	Styrene Acrylic Copolymer	White Emulsion	45±1	3000±500	7~9	34	Binder for Art Paper and MC Coating	Hard Film, Good Picking Property, Luster, Weather and Water Resistance
P-25	Vinyl Acetate Acrylic Copolymer	White Emulsion	50±1	<100	2~4	5	Binder for Art Paper and MC Coating	Good Picking Property, Smoothness, Whiteness and Heat Resistance
2NS	Vinyl Acetate Resin	White Emulsion	50±1	2500±500	2~4	13	Used in Undercoating of DIAZO Photo-Sensitive Paper	Excellent Silica Miscibility and Water Resistance
PC-45-2	Styrene Acrylic Copolymer	White Emulsion	45±1	3000±500	7~9	34	Coating for Speaker's Cone Paper	Hard Film, Good Picking Property, Luster, Weather and Water Resistance
